ELECTRONIC

Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

Notice of the Office communication was sent electronically on above-indicated "Notification Date" to the following e-mail address(es):

patentdocket@oblon.com
oblonpat@oblon.com
jgardner@oblon.com

Office Action Summary	Application No. 10/781,917	Applicant(s) HORIO, TOHRU	
	Examiner MICHAEL C. MCCULLOUGH	Art Unit 3653	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 07 December 2007.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-45 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1-45 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
 2. ☐ Certified copies of the priority documents have been received in Application No. _____.
 3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

The amendment filed 07 December 2007 has been entered.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

1. Claims 4 and 5 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.
2. Claim 4 and 5 recite the limitation "the at least one of the detecting devices" in lines 2. There is insufficient antecedent basis for this limitation in the claim.

Claim Rejections - 35 USC § 103

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

3. Claims 1-12, 14-26, 28-40, 42-45 are rejected under 35 U.S.C. 103(a) as being unpatentable over Jacobson et al. (US 5,924,686) in view of Sashida (US 6,788,440 B1). Jacobson et al. discloses a sheet pick-up device/means for picking (36) that is a roller, pull-out rollers (46), a drive device/means for driving (47), a detecting device/means for detecting (50), a control device/means for controlling (49) that changes the speed based on a detection result (see column 7 line 54 through column 8 line 22), means for forming an image (12), the control device measures the drive amount (see column 7 line 54 through column 8 line 22) and changes the speed if the detecting device does not detect a leading edge and if the drive amount exceeds a

Art Unit: 3653

threshold (see column 8 lines 5-22), a display device (see column 9 lines 52-57) that displays information if a threshold is exceeded. Jacobson et al. does not disclose an image reading device/means for reading an image and a sheet separating device/means for separating comprising a rotary member/means for feeding and a roller/means for obstructing feeding, a second detecting device/second means for detecting. However, Sashida discloses a similar device that includes an image reading device/means for reading an image (400) and a sheet separating device/means for separating comprising a rotary member/means for feeding (221) and a roller/means for obstructing feeding (261), a first and second detecting device/first and second means for detecting (S1 and S2) for the purposes of duplicating an image (see column 7 lines 12-21), separating and conveying an original or only the uppermost one of a plurality of originals (see column 6 lines 22-29), detecting leading edges before separating (see column 8 lines 63-65) and leading edges after separating (see column 9 lines 9-13). It would have been obvious for a person of ordinary skill in the art at the time of the applicant's invention to modify Jacobson et al. by utilizing an image reading device/means for reading an image and a sheet separating device/means for separating comprising a rotary member/means for feeding and a roller/means for obstructing feeding, a second detecting device/second means for detecting, as disclosed by Sashida, for the purposes of duplicating an image, separating and conveying an original or only the uppermost one of a plurality of originals, detecting leading edges before separating and leading edges after separating.

4. Claims 13, 27, and 41 are rejected under 35 U.S.C. 103(a) as being unpatentable over Jacobson et al. (US 5,924,686) in view of Sashida (US 6,788,440 B1), as applied to claims 1-9, 12, 14-23, 26, 28-37, 40, 42-45 above, in farther view of Hamamoto et al. (US 6,421,581 B1). Jacobson et al. in view of Sashida discloses all of the limitations of the claims but does not disclose a pulse motor. However, Hamamoto et al. discloses a similar device that includes a pulse motor (34) for the purpose of controlling the feeding of a sheet (see column 6 lines 13-35). It would have been obvious for a person of ordinary skill in the art at the time of the applicant's invention to modify Jacobson et al. in view of Sashida by utilizing a pulse motor, as disclosed by Hamamoto et al., for the purpose of controlling the feeding of a sheet.

Response to Arguments

5. Applicant's arguments, see page 26, filed 07 December 2007, with respect to the rejection(s) of claim(s) 15, 29, 44 and 45 under 35 U.S.C. 103(a) have been fully considered and are persuasive. Therefore, the rejection has been withdrawn. However, upon further consideration, a new ground(s) of rejection is made in view of Jacobson et al. in view of Sashida and Jacobson et al. in view of Sashida in view of Hamamoto et al.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to MICHAEL C. MCCULLOUGH whose telephone number is (571)272-7805. The examiner can normally be reached on Monday-Friday, 7:00 am - 3:30 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Patrick Mackey can be reached on (571) 272-6916. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
